RE: Shady Grove Township Voters

Dear Captain Hollingsworth,

I have received information of potential voter fraud pertaining to the current wet/dry issue being considered in the Shady Grove township of Greene County, Arkansas.

It is my understanding that in June 2016, there were 71 registered votes residing within the township. By the time early voting began on October 25, 2016, the voter roll had increased to 103 registered voters within the township.

It does not strike me as a coincidence that the wet/dry vote for the township was being considered during the same time frame the township's population increased by 45%.

I have received reports that several used camper trailers are being used as the places of residence for some of the township's newest registered voters. These trailers appear not to be habitable due to lack of basic utilities, such as water, electricity, and/or gas connections.

It is also my understanding that at least two of the newly registered voters changed their voter registration back to their original county of residence once this issue was published by local media reports.

I would appreciate the Arkansas State Police opening a criminal investigation into this matter and reporting its findings to me at its earliest convenience. If there are any questions, please contact me at the number above.

As always, thank you for your service.

Sincerely,

A handwritten signature in blue ink that reads "SCOTT ELLINGTON".

Scott Ellington
